MedVenture Partners, Inc.

Additional Investment in mediVR, Inc.

MPI-2 Investment Limited Partnership (MPI), managed and operated by MedVenture Partners, Inc., participated in a 300 million Japanese Yen Series B round of mediVR, Inc.

mediVR develops medical devices and systems that utilize Virtual Reality technology, and has been selling the mediVR KAGURA, a class I medical device that evaluates physical and cognitive ability required for gait, since March 2019.

Hajime Oshita, President of MPI, will continue to be a member of the Board of Directors, supporting the accelerated development and distribution of mediVR's products.

MPI will continue to actively invest in the medical device space while accelerating the growth of medical device startups in Japan, bridging overseas startups and Japanese companies, and contributing to the development of a medical device ecosystem in Japan.
